

# MD Mirajul Islam

*React Native Engineer — Cross-Platform Mobile App Developer*

React Native Engineer with 3 years of experience building scalable cross-platform mobile applications for Android and iOS. Experienced in React Native, TypeScript, Firebase, AWS, real-time systems, payment integration, and performance optimization. Skilled in developing production-ready applications with clean architecture, reusable components, API integration, and modern mobile UI/UX practices.

| <i>Databases</i>            | MySQL, DynamoDB, Firestore                    |
| <i>Tools</i>                | Git, Axios, AsyncStorage, Cloudinary          |

## PROJECTS

---

### Fitcode – Company Project

Built and maintained a production-ready cross-platform mobile application for Android and iOS as the sole React Native developer.

- Built scalable and responsive mobile application features using React Native for Android and iOS.
- Implemented secure authentication and API-driven architecture with reusable UI components.
- Integrated Apple Pay and Google Pay using Stripe Payment Sheet.
- Developed real-time group chat functionality using AWS DynamoDB.
- Integrated Google Fit and Apple HealthKit for fitness and health data synchronization.
- Implemented push notification workflows using OneSignal.
- Tech Stack: React Native, JavaScript (ES6+), Stripe SDK, AWS DynamoDB, REST APIs.

### SWOP – Company Project

Contributed to a production-ready React Native application for Web3 social networking, SmartSite profiles, feed interactions, and commerce flows.

- Developed and enhanced core social feed features including comments, nested replies, reposts, quote reposts, and post-detail navigation.
- Built media-rich interactions with image, video, GIF uploads, tagging, and location support across posts and comments.
- Implemented a reusable video player with autoplay, mute/unmute sync, thumbnails, fullscreen viewing, and optimized multi-video rendering.
- Developed background upload workflows with upload progress tracking, video compression, and chunked uploads for posts and mint content.
- Optimized feed performance, scrolling behavior, loading states, and rendering stability across multiple modules.
- Tech Stack: React Native, TypeScript, Redux, React Navigation, Cloudinary, Giphy SDK, React Native Video.
